

## Evaluation of security functionalities

SL 1	Capability to protect against casual or coincidental violation
SL 2	Capability to protect against intentional violation using simple means with low resources, generic skills and low motivation
SL 3	Capability to protect against intentional violation using sophisticated means with moderate resources, IACS specific skills and moderate motivation
SL 4	Capability to protect against intentional violation using sophisticated means with extended resources, IACS specific skills and high motivation

## Evaluation of security processes

ML 1	Initial - Process unpredictable, poorly controlled and reactive
ML 2	Managed - Process characterized, reactive
ML 3	Defined - Process characterized, proactive deployment
ML 4	Improved - Process measured, controlled and continuously improved

## Protection Levels

Maturity Level

3 or 4				
1 or 2	No PL according to this standard			
	1	2	3	4
	Security Level			

PL 1

Protection against casual or coincidental violation

PL 2

Protection against intentional violation using simple means with low resources, generic skills and low motivation

PL 3

Protection against intentional violation using sophisticated means with moderate resources, IACS specific skills and moderate motivation

PL 4

Protection against intentional violation using sophisticated means with extended resources, IACS specific skills and high motivation
